**Where Gartner positions MyWave in the Gen AI Landscape in 2023**

Gartner

1. Foundation Models			2. Applications		3. Enabling Tools	
Foundation Models	Fine Tuned Models	Domain Models	Embedded Applications	Native Applications	Build Tools	Use Tools
OpenAI, Microsoft, Google, Anthropic, AI21,Cohere, Baidu, Stability	Databricks, Hugging Face, AWS	BloombergG, PT Finance, Microsoft, Stanford, CRFM, IBM watsonx.ai, MYWAVE.ai	Function Specific: Jasper AI, Tome, Rytr, Lavendar, Notion, Cogram Vertical Specific: HarveyAI (legal)		Samba Nova, IBM watsonx,ai, nVidia AI Enterprise	LlamaIndex, LangChain, Weaviate
4. Custom Services						
Custom service offerings that involve one or more of these areas, and may integrate other systems and technologies						

**Founded in 2015
Leader in Gen AI Process Domain
Models for Enterprise Business**

"Using MyWave.AI we reduced development time by 75% and cost by over 85%."
Michael Vrontamitis, MyWave Partner, T3i

How we craft effortless Business Workflows for your Customers

- Traditionally we built software using an IMPERATIVE approach. At the end of a sequential series of steps, the user gets the outcome they were looking for.

- MyWave Gen-AI works on a DECLARATIVE approach. We tell the user interface what we want. Then the AI does all the work and we just get the outcome we were looking for.

- Data orchestration and dynamic flows speed up processes and make things easy and intuitive for users.

- MyWave was designed to provide practical and explainable Gen-AI solutions for business.

**IMPERATIVE
SEQUENTIAL POINT-AND-CLICK RIGID WORKFLOWS**

**DECLARATIVE
MYWAVE GEN AI – DESCRIBE AND DONE**

Welcome to the MyWave Innovation Hub for SAP Business One - compliant with S4/Hana and ECC6
